

Notice to PacBio customers:

The cassette definition in the PacBio SMRTBell cassette definition set,

“0.75%DF Marker S1 high-pass 4-10kb vs2.ppcass”,

is identical to an earlier cassette definition,

“0.75%DF Marker S1 Greater than 4-10kb vs2.ppcass”,

that was distributed to some early access customers. To ensure compatibility with future cassette definition releases, we encourage customers to use the “high-pass” cassette definition for all future protocols.
